DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3-14-07 has been entered.

Response to Arguments

2. Applicant's arguments, see page 5, filed 3-14-07, with respect to the 35 USC 103 rejection of record have been fully considered and are persuasive. The previous rejection has been withdrawn.

Examiner's Amendment

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Takagi on 7-23-07.

The application has been amended as follows:

In claim 1 and claim 6:

line 8: after "material" insert –to achieve the binder uniformly absorbed on the surface of the substrate"

line 9: after "material" insert –whereby a lower noise and higher density coating is achieved by reducing secondary coagulation as compared to initial contact of binder and ferromagnetic material powder in a mixer".

Allowable Subject Matter

4. Claims 1-8 are allowed. The drawings filed 6-24-03 are acceptable.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

The present invention includes independent claims 1 and 6. Both claims recite a method for producing a magnetic recording medium having a nonmagnetic substrate coated with a magnetic coating material containing a ferromagnetic powder and a binder.

Sueyoshi et al is considered the closest prior art. Sueyoshi et al discloses a method for producing a magnetic recording medium having a nonmagnetic substrate coated with a magnetic coating material containing a ferromagnetic powder and a binder. A ferromagnetic powder and solvent is disclosed as initially separate from a binder

Sueyoshi et al does not disclose the claimed combination including:

In claim 1:

preparing a liquid A constituted by a ferromagnetic powder and a solvent;
preparing a solution B of a binder;
mixing the liquid A and the solution B together in a liquid-liquid state by applying an ultrasonic wave thereto, and thereafter subjecting the mixture to dispersion processing to obtain a magnetic coating material to achieve the binder uniformly absorbed on a surface of a substrate; and
coating a nonmagnetic substrate with the magnetic coating material whereby a lower noise and higher density coating is achieved by reducing secondary coagulation as compared to initial contact of binder and ferromagnetic material powder in a mixer.

In claim 6:

preparing a liquid A constituted by a ferromagnetic powder and a solvent;
preparing a solution B of a binder;
subjecting the liquid A to dispersion processing by applying an ultrasonic wave thereto, and thereafter mixing the liquid A and the solution B together in a liquid-liquid state to obtain a magnetic coating material to achieve the binder uniformly absorbed on the surface of the substrate; and
coating a non-magnetic substrate with the magnetic coating material whereby a

lower noise and higher density coating is achieved by reducing secondary coagulation as compared to initial contact of binder and ferromagnetic material powder in a mixer.

For these reasons claims 1 and 6 are deemed to be allowable over the prior art of record, and claims 2-6, 7-8 are allowable by dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
